Subject Index

Acute myocardial infarction, acyl-streptokinase-plasminogen activator complex in (WALKER, DAVIDSON, RAE, HUTTON & LAWRIE), 344.
Anaemia, antibody-induced haemolytic, depression of Rh antigen expression in (ISSITT, WILKINSON & GRUPPO), 688.
Anaemia, aplastic, bone marrow fibroblast function in relation to granulopoiesis in (GORDON & GORDON-SMITH), 483.
Anaemia, aplastic, management of (GORDON-SMITH), 185.
Anaemia, megaloblastic, in the very young, management of (CHANARIN), 1.
Anaemia, severe aplastic, regeneration of peripheral blood cells following ABO incompatible allogenic bone marrow transplantation for (HOWS, CHIPPING, PALMER & GORDON-SMITH), 145.
Anaemia, sideroblastic, globin chain synthesis ratios in (PETERS, MAY & JACOBS), 201.
Anaemia, untreated pernicious, granulocyte function in (KÄTKÄ, SEGER, MATSUNAGA, TOIVANEN & HITZIG), 23.
Arachidonic acid metabolism by platelets of differing size (JAKUBOWSKI, THOMPSON, VAILLANCOURT, VALERI & DEYKIN), 503.
Aspirin prevents heparin-induced platelet aggregation *in vivo* (JANSON, MOAKE & CARPINITO), 166.

Book reviews
Biochemistry and Function of Phagocytes, 358.
Bone Marrow Biopsy, 358.
Comparative Clinical Aspects of Sickle Cell Disease, 174.
Disorders of Iron Metabolism, 535.
Hemostasis and Thrombosis: Basic Principles and Clinical Practice, 175.
Methods in Hematology: The Hemophilias, 177.
Myeloma and Related Disorders, 176.
The Molecular Basis of Mutant Hemoglobin Dysfunction, 357.
Venous and Arterial Thrombosis, 174.

Cyclosporin A is associated with faster engraftment and less mucositis than methotrexate after allogeneic bone marrow transplantation (ATKINSON, BIGGS, TING, CONCANNON, DODDS & PUN), 265.

Dexamethasone, effects on erythroid colony and burst formation from human fetal liver and adult marrow (Roodman, Lee & Gidari), 621.
Dexamethasone enhances 'CSA' release and depresses 'BPA' release (Nissen, Moser, Speck, Bürgin & Bendy), 301.
Duffy antigens, a proven case of maternal alloimmunization due to, in donor blood used for intrauterine transfusion (Contreras, Gordon & Tidmarsh), 355.
Dusard syndrome (Soria, Soria & Caen), 575.
Dysfibrinogenaemia, congenital, a new type of, with defective fibrin lysis—Dusard syndrome: possible relation to thrombosis (Soria, Soria & Caen), 575.

Endothelial cell thromboplastin synthesis, cellular cooperation in (Lyberg, Galdal, Evensen & Prydz), 85.
Eosinophilia, extreme transient, in a healthy infant: eosinophil colonies (CFU-EO) studied in culture (Ballin, Meytes, Lieberman & Ramot), 168.
Erythroblasts from human bone marrow, enrichment using complement-mediated lysis: measurement of ferritin (Ali, May, Jones & Jacobs), 227, 349.
Erythroblasts, impaired protein synthesis in, enhances their phagocytosis by macrophages (Wiener & Wickramasinghe), 117.
Erythrocyte ferritin in normal subjects and patients with abnormal iron metabolism (Peters, Jacobs & Fitzsimons), 211.
Erythrocyte filterability in normal pregnancy and pre-eclampsia (Stuart, Kenny & Inglis), 353.
Erythroid burst formation *in vitro*, influence of tumour promoter TPA upon (Brockbank), 477.
Erythropoiesis, cell–cell interactions in the regulation of (Lipton & Nathan), 361.

Factors V and VIII, inhibitor of protein C and combined deficiency of (Vicente, Alberca & Lopez Borrasca), 686.
Factor VIII coagulant antigen in the presence of VIII:C antibodies, studies on the stability of (Furlong & Peake), 55.
Factor VIII, stability of, during the preparation of an intermediate-purity factor VIII concentrate (Foster, Dickson & McQuillan), 343.
Factor VIII/von Willebrand factor multimers in plasma, an electroblotting technique for the detection of (Furlong & Peake), 641.
Factor IX, analysis of IgG heavy chain subclasses of alloantibodies to, by crossed immunoelectrophoresis of factor IX using the intermediate gel technique (Iizuka & Nagao), 687.
Ferritin, clearance for the plasma: possible role of ferritin binding proteins (Covell, Jacobs & Worwood), 349.
Ferritin in the red cells of normal subjects and patients with iron deficiency and iron overload (Cazzola, Arosio, Barosi, Bermamaschi, Dezza & Ascari), 659.
Fibrinogen biosynthesis, stimulation by fibrinogen fragments D and E (Bell, Kessler & Townsend), 599.
Fibrinogen Manchester, delayed release of an abnormal fibrinopeptide A from: effect of the Aα 16 Arg→His substitution upon fibrin monomer polymerization and the immunological crossreactivity of the peptide (Lane, Southan, Ireland, Thompson, Kehl & Henschen), 587.
Fibrin monomer polymerization, idiopathic autoantibody that inhibits (Ghosh, McEvoy & McVerry), 65.
Fibroblast colonies (CFU-F) in short-term semi-solid human marrow cultures (Reynolds & McCann), 347.
Folate polyglutamate synthesis following B_{12} inactivation, impairment of: correction by methionine, s-adenosyl-methionine and 5′ methylthioadenosine (Perry, Deacon, Lumb & Chanarin), 348.

Globins, unstable, in human bone marrow, rapid proteolysis of (Vissers, Winterbourn & Carrell), 417.
Granulocyte function in untreated pernicious anaemia (Kätkä, Seger, Matsunaga, Toivanen & Hitzig), 23.
Granulocyte–macrophage progenitor cell preservation at 4°C (Delforge, Ronge-Collard, Stryckmans, Spiro & Malarme), 49.
Granulocyte subpopulations, modifications of, and of their adherence property during filtration leukapheresis in man (Silvani, Tedesco, Marconi & Sirchia), 43.
Granulocyte transfusions, the significance of pulmonary infiltrates developing in patients receiving (Dana, Durie, White, Huestis & Paplanus), 437.

Haemoglobin, fetal, estimation in healthy adults by radioimmunoassay (Rutland, Pembrey & Davies), 673.
Haemoglobin–spectrin crosslinking, *in vivo*, irreversible: a marker for red cell senescence (Snyder, Leb, Piotrowski, Sauberman, Liu & Fortier), 379.
Haemopoietic stem cells, pluripotent (CFU-GEMM), in the human fetus, studies of (Hann, Bodger & Hoffbrand), 348.
Haemostatic defects, acquired, in the ill newborn (Feusner, Slichter & Harker), 73.
Hemochromatosis Research Foundation (Krikker), 165.
Heparin-binding platelet proteins demonstrated by crossed affinity immunoelectrophoresis (Gogstad, Solum & Krutnes), 563.
Hyperbilirubinaemia, neonatal, in heterozygous glucose-6-phosphate dehydrogenase deficient females (Meloni, Forteleoni, Dore & Cutillo), 241.

Idiopayhic thrombocytopenic purpura, platelet antibody levels do not correlate with response to therapy in (Kernoff & Malan), 559.
IgG preparations, monomeric, for intravenous use inhibit platelet stimulation by polymeric IgG (Gross, Haessig, Luescher & Nydegger), 289.
Insulin stimulates erythroid colony formation independently of erythropoietin (Kurtz, Jelkmann & Bauer), 311.

Leucocyte labelling techniques, five: a comparative *in-vitro* study (Colas-Linhart, Barbu, Gougerot & Bok), 31.

Leukaemia, acute lymphatic (MAGNANI, TERRACINI, PASTORE, MADON & MINIERO), 531.
Leukaemia, acute lymphoblastic, testicular infiltration in (KAY), 537.
Leukaemia, acute megakaryoblastic, 5-nucleotidase activity of megakaryoblasts in a case of (EL-MOHANDES & HAYHOE), 523.
Leukaemia, acute megakaryoblastic, reversal of marrow fibrosis in, after remission-induction and consolidation chemotherapy followed by bone marrow transplantation (MEHTA, BAUGHAN, CATOVSKY, GOLDMAN, JOHNSON & GALTON), 445.
Leukaemia, acute, mismatched family member bone marrow transplants for (POWLES, MORGENSTERN, LAWLER, CLINK, MCELWAIN & KAY), 344.
Leukaemia, acute myeloid, autologous stem cell grafting in: technical approach of marrow incubation *in vitro* with pharmacological agents (prerequisite for clinical applications) (HERVE, TAMAYO & PETERS), 683.
Leukaemia, acute myeloid, in first remission, the elective use of autologous bone marrow transplantation in (BURNETT, TANSEY, SHEEHAN, MCDONALD & HILLS), 345.
Leukaemia, acute myeloid, non-specificity of Sudan Black B in the diagnosis of (HO, CHAN & TODD), 171.
Leukaemia, acute non-lymphocytic, adverse effects of aneuploidy on the outcome of remission induction therapy for: analysis of types of treatment failure (PREISLER, REESE, MARINELLO & POTHIER), 459.
Leukaemia cell line, human, K562, treated with methotrexate-γ-aspartate encapsulated in liposomes (BRAGMAN, HEATH & PAPAHADJOPOULOS), 345.
Leukaemia, childhood acute lymphoblastic: the late effects of treatment (CHESSELLS), 369.
Leukaemia, chronic myelomonocytic, skin infiltration associated with (DUGUID, MACKIE & MCVERRY), 257.
Leukaemia, myeloid, quantitative cytochemistry of blood neutrophils in (SCHOFIELD, STONE, KELSEY, LEYLAND & STUART), 345.
Leukaemic lymphocytes, chronic lymphocytic, the type of subcellular distribution of immunoglobulin in (JOHNSTONE & MILLARD), 346.
Leukapheresis, filtration, in man, modifications of granulocyte subpopulations and of their adherence property during (SILVANI, TEDESCO, MARCONI & SIRCHIA), 43.
Lymphocyte subpopulations, human, cytochemistry delineated by monoclonal antibodies (BERNHARD, DUFER, ARMITAGE, LINCH, WORMAN & CAWLEY), 351.
Lymphoma, non-Hodgkins, advanced low grade, the significance of the bone marrow aspirate and trephine in (CLOUGH, BLACKLEDGE, CROWTHER, GARRETT, CHANG & DODGE), 348.

Malaria and iron (POLLACK), 181.
Malonyldialdehyde, a product of lipid peroxidation, effect on the deformability, dehydration and ^{51}Cr-survival of erythrocytes (JAIN, MOHANDAS, CLARK & SHOHET), 247.
Mast-cell precursors in various haematopoietic colonies of mice produced *in vivo* and *in vitro* (SONODA, KITAMURA, HAKU, HARA & MORI), 611.
Megakaryocytes, senescent, fate in the bone marrow (RADLEY & HALLER), 277.
Metaplasia, agnogenic myeloid, immune disorders in: relations to myelofibrosis (RONDEAU, SOLAL-CELIGNY, DHERMY, VROCLANS, BROUSSE, BERNARD & BOIVIN), 467.
^{99}Mo, binding of, to red cell membrane proteins is not affected by reducing agent (BÍBR, MAŘÍK, KSELÍKOVÁ & LENER), 172.
Monoclonal antibodies, immunoenzymatic labelling of haematological samples with (MOIR, GHOSH, KNIGHT, ABDULAZIZ, VANSTAPEL & MASON), 347.
Monoclonal antibodies, immunohistological analysis of frozen bone marrow biopsies with (FALINI, MARTELLI, TARALLO & MASON), 347.
Myelodysplasia, quantitative cytochemistry of blood neutrophils in (SCHOFIELD, STONE, KELSEY, LEYLAND & STUART), 345.
Myelodysplastic syndromes, biologic rather than morphologic markers in (GREENBERG & BAGBY), 532.
Myelofibrosis, relations to: immune disorders in agnogenic myeloid metaplasia (RONDEAU, SOLAL-CELIGNY, DHERMY, VROCLANS, BROUSSE, BERNARD & BOIVIN), 467.
Myeloid cell differentiation in lymphoid blast crisis of CML (GREAVES), 529.
Myeloma, multiple, abnormal monoclonal antibody-define helper/suppressor T-cell subpopulations in: relationship to treatment and clinical stage (MILLS & CAWLEY), 271.
Myeloma, multiple: optimal use of salmon calcitonin in the management of myeloma osteoclastic bone disease (BATAILLE, TENOUDJI-COHEN & ROSSI), 170.
Myeloma, the use of diphosphonates in (KANIS, PATERSON & RUSSELL), 688.

Natural killer cells, recognition of marrow elements by: are NK cells involved in haemopoietic regulation? (O'BRIEN, KENDRA, STEPHENS, KNIGHT & BARRETT), 161.
Neutrophil granule proteins, the effects of surgery on the activity of (DAVIES, SHEPPARD & FLETCHER), 5.
Neutrophil, toxic granulation blood, quantitative cytochemistry of (SCHOFIELD, STONE, BEDDALL & STUART), 15.
Nitrous oxide in man, studies on the haemopoietic toxicity of (SKACEL, HEWLETT, LEWIS, LUMB, NUNN & CHANARIN), 189.
Nucleotide levels, red cell, in patients with thalassaemia, iron deficiency, and renal failure (CROWTHER & CAUCHI), 113.

PAF-acether, effect of structural analogues of, on platelet desensitization (LALAU KERALY, COEFFIER, TENCÉ, BORREL & BENVENISTE), 513.
Phenotypic T precursor cells in human cord blood, evidence for (GERLI, RAMBOTTI, CERNETTI, VELARDI & SPINOZZI), 685.
Phlebotomy, the effect of: ^{125}I fibrinogen turnover in polycythaemia (BOUGHTON & DALLINGER), 97.
Platelet secretion, a new congenital defect of: impaired responsiveness of the platelets to cytoplasmic free

calcium (HARDISTY, MACHIN, NOKES, RINK & SMITH), 543.
Polycythaemia, ^{125}I fibrinogen turnover in: the effect of phlebotomy (BOUGHTON & DALLINGER), 97.
Preleukaemic, lymphoproliferative and plasma cell disorders, concurrent development of (GREENBERG, MILLER, CARDIFF, MACKENZIE & WALLING), 125.
Protein-energy malnutrition, folate levels and deoxyuridine suppression tests in (WICKRAMASINGHE, AKINYANJU, GRANGE & LITWINCZUK), 135.
Pyruvate kinase, human erythrocyte, studies with: effects of modification of sulfhydryl groups (VALENTINE & PAGLIA), 385.

Red cells, stored, relationship of post-transfusion viability to deformability (CARD, MOHANDAS & MOLLISON), 237.
Rhesus immunization in male volunteers: changes in lymphocyte functions following secondary immunizations in anti-D responders and non-responders (BARCLAY, GREISS, MCCANN & URBANIAK), 629.
Rh immunization facilitated by passively-administered anti-Rh? (CONTRERAS & MOLLISON), 153.

Sickle cell disease, mean red cell volume, globin chain synthesis and iron deficiency in (DAVIES, HENTHORN & BROZOVIC), 350.
Sickle cell formation, irreversible, effects of valinomycin, A23187 and repetitive sickling on (WESTERMAN & ALLAN), 399.
Stroke, activation of coagulation and fibrinolytic systems following (LANE, WOLFF, IRELAND, GAWEL & FOADI), 655.
Stromal cells, human marrow, effect on proliferation by human granulocytic (GM-CFC), erythroid (BFU-E) and mixed (Mix-CFC) colony-forming cells (GORDON, KEARNEY & HIBBIN), 317.

T cell regeneration after allogeneic and autologous bone marrow transplantation (LINCH, KNOTT, THOMAS, HARPER, GOLDSTONE, DAVIS & LEVINSKI), 451.
T cells, helper/suppressor, in B-cell malignancies (MILLS, WORMAN & CAWLEY), 346.
Thalassaemia, β-, a new approach for the antenatal diagnosis of: a double labelling immunofluorescence microscopy technique (THORPE & HUEHNS), 103.
Thalassaemia, β-, a new DNA polymorphism in the β-globin gene cluster can be used for antenatal diagnosis of (OLD & WAINSCOAT), 337.
Thalassaemia genes, alpha and beta, interacting, alpha globin gene analysis in a Sardinian family with (MELIS, GALANELLO & CAO), 667.
Thalassaemia intermedia in Cyprus: the interaction of α and β thalassaemia (WAINSCOAT, KANAVAKIS, WOOD, LETSKY, HUEHNS, MARSH, HIGGS, CLEGG & WEATHERALL), 411.
Thalassaemia, iron deficiency, and renal failure, red cell nucleotide levels in patients with (CROWTHER & CAUCHI), 113.
Thrombin generation and platelet activation in blood clotting *in vitro* (HUGHES, WOODHAMS, MOYLE & KERNOFF), 343.
Thromboplastin as a marker for monocyte differentiation (LYBERG, IVHED, PRYDZ & NILSSON), 327.
Thrombosis, factors influencing, in familial antithrombin III deficiency (WINTER & BENNETT), 527.
Thromboxane B_2, generation of, by uraemic platelets and the effects of dialysis (WINTER, MACHIN, CAMERON & BARKHAN), 343.
Transferrin-donated iron in rabbit reticulocytes, studies on the partition of. II. Distribution and kinetics of non-haem iron in cytosol (EGYED), 217.

Vitamin B_{12} assays, solid-phase, using polyacrylamide-bound intrinsic factor and polyacrylamide-bound R-binder (MUIR & CHANARIN), 423.

von Willebrand factor- and thrombin-induced aggregation, effect on. III. Antibodies against platelet membrane glycoproteins (JENKINS, CLEMETSON & ALI-BRIGGS), 491.
